Skills

English*4 Italian*6 Spanish*3
(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Education

since-2023	PhD student <i>NeuroRobotics.</i>	University of Padua
2023-2020	Master degree on Computer Engineering <i>Robotics and Artificial Intelligence.</i>	University of Padua
2017-2020	Degree on Computer Engineering	University of Padua
2012-2017	High school Graduation Scientific High School	high school Rogazionisti, Padua

Experience

2022-2017	Reps Teacher I help high school students to do homeworks and I explain math, science and physic concept to them.	
2020	Internship I did a backend of an application for theater reservation. In this application I used Java, Springboot, Swagger UI, MongoDB and JaCoCo. I did this project for my degree thesis.	Lynx S.P.A.
2012-2020	Educator I worked as educator for kids and I have planned a summer camps.	ACR and Parish

Project

2023	Discrete and continuous control for brain-actuated robotic devices Thesis project For my thesis I studied some Brain Machine Interface techniques. Therefore, I developed continuous control of a wheelchair based on dynamic system and I evaluated it with some experiments.	
2021	Bitcoin Truster For Learning from Network course I did with other students an analysis on a bitcoin transaction graph. We used Python and library like Networkx.	Team Project
2021	Vehicle counting For Cognitive Services course I realized with other students an application that recognize vehicle and count them. We used a classical approach based on feature matching and a state of art approach based on YOLO. Both methods were implemented using Python.	Team Project
2021	Boat detector For Computer Vision course I realized a boat detector using OpenCV library and C++ as language. Moreover, I used machine learning algorithms.	Personal Project
2020	Theater reservations For Internship and thesis I realized a backend for an application for theater reservations. In this application I used Java as program language, Swagger UI as user interface, MongoDB as database and JaCoCo to coverage analisis on JUnit tests. Furthermore, I developed two application with two different communication system, one with an synchronous messages (using an API-gateway) and another with asynchronous message (using Apache Kafka).	Personal Project

Pubblications

A. Palatella, P. Forin, S. Tortora, E. Menegatti, L. Tonin, "An alternative training protocol for a motor imagery BMI based on a collaborative approach", In: 9th Graz BCI Conference 2024, Graz

P. Forin G. Beraldo, S. Tortora and L. Tonin, "Optimization and evaluation of the control framework for brain-machine interfaces," 2024 IEEE 20th International Conference on Automation Science and Engineering (CASE), Bari, Italy

G. Beraldo, P. Forin, L. Tonin, "Optimising the continuous control of brain-actuated robotic devices", In: CEUR Workshop Proceedings - Proceedings of the 9th Italian Workshop on Artificial Intelligence and Robotics (AIRO), 28 November 2022 - 02 December 2022, Udine, Italia

P. Forin, S. Tortora, E. Menegatti, and L. Tonin "Towards a shift and sustain-based decoding architecture for Covert Visuospatial Attention BMI in a natural environment", under submission for IEEE Transactions on Systems, Man, and Cybernetics (SMC) 2025
